

SmartTrack^{PRO}[™]

Campus Package and Mail Tracking Made Easy

Smart Track Pro[™] provides

Directory Integration

for quick lookup of students, faculty and staff. Automatically email or text message notifications when packages are received.

Chain-of-Custody Tracking

with detailed information about each and every package.

Detailed Reporting

of packages received, delivered or held by week, month or year.

Smart Track Pro[™] is a web-based package tracking software system.

Campus mailrooms receive hundreds, if not thousands, of packages and pieces of mail every day for students, on and off-campus residents, faculty and staff. Receiving, sorting, logging, notifying recipients and delivering these items can become overwhelming. Smart Track Pro[™] (STP) can streamline this entire process and help make your mailroom more organized and manageable.

STP enables you to easily automate and manage the process of receiving, processing and delivering of packages and mail. It provides complete “chain of custody” accountability from the time a package is received at the campus mailroom until it is signed for at its final destination.

Schedule a Smart Track Pro[™] demo today.
