Delivery Tracker

MODULE

**It's as easy
as 1-2-3**

Step 1

The Courier scans the QR Code on the Delivery Label or Job Ticket to take possession of all orders. Multiple jobs can be combined using the "bundle" feature.

Step 2

Upon delivery, the Courier presents a mobile device to the recipient for a signature of acceptance.

Step 3

The Courier can enter notes about the delivery and mark the order as Accepted, Rejected, Left without Signature, Undeliverable or Returned to Shop. PSP Manager is updated automatically.

Ensure Print Orders Reach Customers On Time Every Time

Put an end to those mysterious and costly lost deliveries. PSP Delivery Tracker can provide print shop staff and customers with real time visibility into the delivery status of all print and store orders.
